piece 1, NC_000913, frr_dxr-, config: linear, direction: -, begin: 193550, end: 193410

Protein sequence alignment showing mutations in the 193500-193470 region. The alignment shows the amino acid sequence for each protein, with mutations highlighted in red circles. The sequence starts with a methionine at position 193550 and ends with a serine at position 193470. A dashed line indicates the start of the 193470 protein.
